

CORECARD SOFTWARE ANNOUNCES SUPPORT FOR HEALTHCARE SOLUTION PROVIDERS

NORCROSS, GA, May 5, 2011 - [CoreCard Software](http://www.CoreCard.com) (www.CoreCard.com), a leading provider of card management and boutique processing solutions, announces its support for Healthcare card issuers.

“Controlling healthcare costs is a recent focal point of conversation and there are many good ideas about what can be done now,” said J. Leland Strange CoreCard CEO. “CoreCard Software is pleased to offer a solution that can help healthcare providers control costs and make it easier for the insured to be reimbursed from their healthcare savings and reimbursement accounts.”

By using CoreISSUE’s plan segments as “purses,” issuers have an easy way to separate and control funds at the plan level for various purposes. One purse may be a Health Savings Account and another may be set up for prescription drugs, while a third may be used as a Flexible Spending Account.

CoreISSUE provides a flexible set of rules that allow issuers to identify both a primary and a secondary purse to which a purchase authorization can match. This allows an incoming authorization that exceeds the available balance on the cardholder’s primary plan to use any available balance in the second plan to post the purchase transaction against. Since CoreISSUE supports an unlimited number of plan segments, issuers have the ultimate in flexible control.
